

# Valuing Your Soils: Benefits of Precision Agriculture

Come along to this free soils awareness raising event at

West Mains of Kinblethmont Farm  
DD11 4RW  
Thursday 23 February 2017  
11.00 am – 3.00pm  
with lunch provided

To book a place please email  
[joanna.cloy@sruc.ac.uk](mailto:joanna.cloy@sruc.ac.uk)  
or telephone 0131 535 4155

This workshop attracts BASIS CPD points and is supported by CREW at the request of SEPA

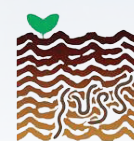

Want practical guidance on how to improve farm efficiency and increase yields through good soil management? At this arable soils workshop you will receive a copy of the recently released 'Valuing Your Soils' brochure and get practical advice for:

- Merging precision agriculture technology with good soil management
- Improving soil structure and maintaining healthy soils
- Identifying and alleviating soil compaction problems
- Managing soil-based constraints to production

#### Programme

- Robert Ramsay from Kinblethmont farm and SoilEssentials Ltd, and experts from SRUC and SEPA will speak about the benefits of using precision agriculture technology, soils practical guidance, relevant research activities and protecting soils and the environment
- Drone flight demonstration and other machinery/technology demonstrations
- Farm tour with open soil pits
- Practical demonstrations of soil visual evaluation
- Open discussions between farmers, advisors and researchers

International  
Decade of Soils  
2015 - 2024
